Hello,

The following submission has been created.

Track Name: AIC2026

Paper ID: 2947

Paper Title: Analyzing Business Performance Gains from Cloud Adoption Using Data Driven Approach

Abstract:
Cloud computing has profoundly changed the information technology landscape and how organizations run their business operations. Many organizations have reported improved financial and operational performance after shifting their information technology infrastructure from traditional computing to cloud computing. This study aims to examine the impact of the adoption of cloud computing on business operational performance in terms of cost reduction, collaboration efficiency, and system reliability. Comparative analysis was done on the organization's operational performance before and after the adoption of cloud computing.
